 Creatures of the Kurdish region, in charge of the Ministry of Education and Higher Education of Kurdistan, which is responsible for the technical and educational development of the Ministry of Science and Research of the Kurdistan region, has published an article in the scientific journal of the Kurdistan region, in which it discusses the importance of higher education in the region.

The article, which is titled "The Importance of Higher Education in the Kurdistan Region," discusses the role of higher education in the development and progress of Kurdistan.

The article emphasizes the need for higher education in the Kurdistan region, which is crucial for the development of the region. It highlights the importance of providing quality education and research opportunities for students and researchers in the region.

Moreover, the article underscores the role of higher education in promoting social and economic development in the region. It argues that a strong higher education system can contribute significantly to the economic growth and prosperity of the region.

The article recommends policies and strategies to improve the quality of higher education in the Kurdistan region. It suggests the establishment of new universities and the expansion of existing ones to meet the growing demand for higher education.

Overall, the article provides valuable insights into the importance of higher education in the Kurdistan region and offers a roadmap for its development and growth.
